

C.V. of Prof. Nikolay Kasimov

Nikolay Kasimov is the Russian scientist, Professor at Lomonosov Moscow State University and Full Member of the Russian Academy of Sciences.

Nikolay Kasimov received his PhD in Geography studying landscape geochemistry of fault zones in 1972 and gained Doctor of Science for research of paleo-geochemistry of steppes and deserts landscapes in 1983. Since 1987 he heads the Department of Landscape Geochemistry and Soil Geography. Since 1990 till 2015 he was a dean of the Faculty of Geography at Moscow State University and afterwards from 2015 to the present days he became the President of this faculty. First Vice-President of Russian Geographical Society (since 2009). Reviewer for "Applied Geochemistry", "Sedimentary Geology", "Quaternary Geology", "Eurasian Soil Science", "Pedology", "Ecological Modelling". Founding member and co-editor-in-chief, "Geography. Environment. Sustainability" (2008, in Engl., Moscow). Member of the International Geographic Union. Member of the International Soil Science Union. Co-coordinator of the scientific Dutch-Russian (NWO) and Flandrian-Russian projects (1993-2008). Caspian Region: environmental consequences of sea level risen (quaternary geology, geochemistry, geophysics of the deltaic geosystems. Coordinator of British-Russian educational projects (Dep.of Environment, GB; British Council). Coordinator of many scientific projects: Russian foundation for fundamental research, Ministry of Education and Science RF, Ministry of Natural Resources and Environmental (1994-2014).

Over the last 5 years published about 100 works. At Moscow State University he has courses of lectures: "Geochemistry of the landscapes", "Geochemistry of natural and anthropogenic landscapes". He also gave lectures in Sofia, Havana, Barcelona and Cambridge Universities.
